

LST-104 INCOSE Inflation Index (III) - 7 July 2022

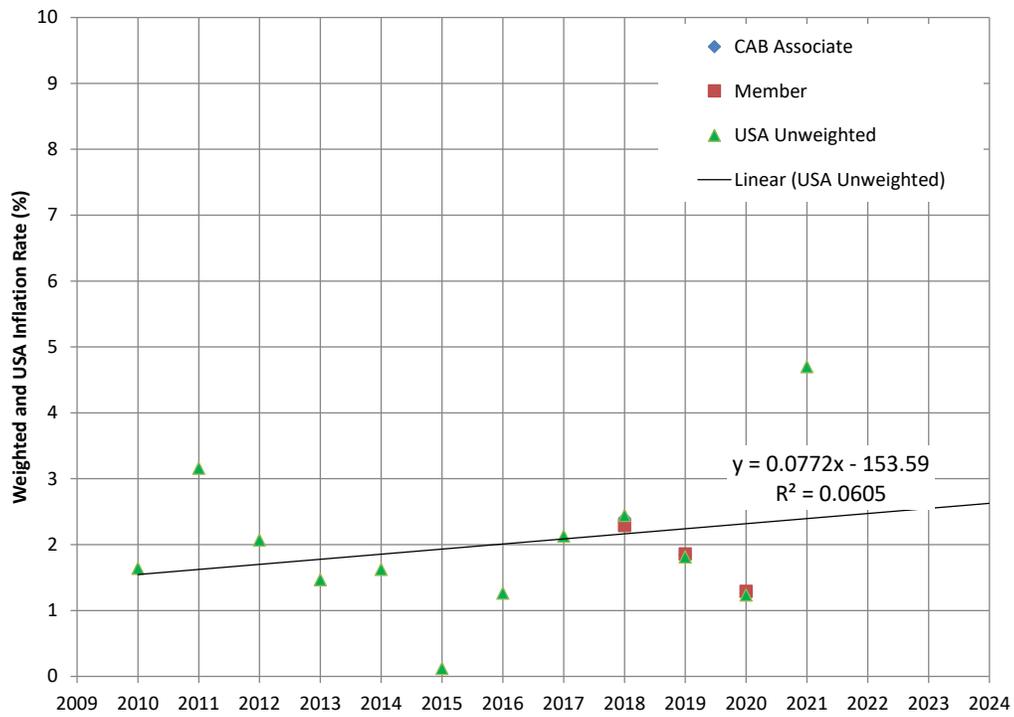

Table of Past and Projected INCOSE Inflation Indices

The INCOSE Inflation Index is based on a measure used by the World Bank to assess Inflation Rates by Country, "Inflation, consumer prices (annual %)".

Inflation Rates are downloaded from the Worldbank site. Weighted INCOSE Inflation Indices were calculated for 2018 - 2020 based on the distribution of CAB Associates and Regular members in January of the current year, and these are compared with the unweighted USA index. Given the similarity of the figures for these three years, the 2021 figure and the prediction for the next three years are based on the USA unweighted index for the last 11 years, as shown in the graph.

Data Source	World Development Indicators												
Last Updated Date	6/30/2022
